SCHEDULE I

(See clause 13)

Sealing, Fastening, Despatch and Analysis of Samples

I. Manner of taking Samples

Samples of any seed for the purpose of analysis shall be taken in a clean dry container

which shall be closed sufficiently tight to prevent leakage and entrance of moisture and shall be carefully sealed.

II. Sampling Intensity

Bulk Sampling – When sampling seed lots are stored in bulk (heaps, bins, wagons, etc.), the following sampling intensity should be regarded as a minimum requirement for obtaining the “bulk sample”.

- (a) upto 500 kilograms – at least 5 individual samples except in case of small lots upto 50 kilograms where a smaller number of samples is sufficient, not less than, 3 samples need be taken.
- (b) 501 to 3,000 kilograms – one individual sample for each 300 kilograms, but not less than 5 individual samples.
- (c) 3,001 to 20,000 kilograms – one individual sample for each 500 kilograms but not less than 10 individual samples.

For seed in bulk the individual samples should be distributed at random all over the bulk and the samples drawn from varying depths.

Bag sampling – For seed lots in bags or other containers the following sampling intensity should be regarded as a minimum requirement:

- (d) upto 5 containers – sample each container but always take at least 5 individual samples.
- (e) from 6 to 30 containers – sample at least one in every three containers but never less than 5.
- (f) 31 containers or more – sample at least one in every five containers but never less than 10.

Unless doubt exists about the homogeneity of a lot, all such primary samples should be combined to make a composite sample of the lot for submitting to the seed testing laboratory. If the individual or primary samples are not sufficiently homogenous, they may be sent to the laboratory for a heterogeneity test.

III. Containers to be labelled and addressed – All containers containing samples for analysis shall be properly labelled and the parcels shall be properly addressed. The label on any sample of seed sent for analysis shall bear-

- (a) serial number;

- (b) name of the sender with official designation, if any;
- (c) name of the person from whom the sample has been taken;
- (d) date and place of taking the sample;
- (e) kind or variety of the seed for analysis;
- (f) nature and quantity of preservative, if any, added to the sample.

IV. Manner of Packing, Fastening and Sealing the Samples – All samples of seeds sent for analysis shall be packed, fastened and sealed in the following manner:

- (a) The stopper shall first be securely fastened so as to prevent leakage of the containers in transit.
- (b) The container shall then be completely wrapped in fairly strong thick paper. The ends of the paper shall be neatly folded in and affixed by means of gum or other adhesive.
- (c) The paper cover shall be further secured by means of strong twine or thread both above and across the container, and the twine or thread shall then be fastened on the paper cover by means of sealing wax on which there shall be at least four distinct and clear impressions of the seal of the sender, of which, one shall be at the top of the packet, one at the bottom and the other two on the body of the packet. The knots of the twine or thread shall be covered by means of sealing wax bearing the impression of the seal of the sender.
