No. L-21021/1/2020-PH(IH)-Part

Sub: Expansion and risk profiling for passengers returning from USA and Australia -reg

Dear Colleagues,

This is in continuation of our letter L-21021/1/2020–PH(IH)-Part dated 13.03.2020. In view of local transmission of the disease, increase in number of cases and deaths being reported in Australia, UK and USA, it has now been to expand the universal screening for all passengers coming from Australia, the United Kingdom and USA and risk profiling them for either quarantine or isolation based on risk assessment.

With warm regards,

Yours sincerely,

2013.27 (Alok Saxena)
